## 2500 watt 12V inverter

This inverter is a Samlex model PSE-12250A rated 2500w continuous, 4000w surge. Works fine and powers a shop vac with no problem as long as it is connected to strong 12V batteries.

This would be great for example in a truck to power various power tools or other equipment. It is lightly used, has sat around most of the time. Note that this is not a pure sine wave inverter.

Can deliver within Yellowknife.

**Price: \$ 150.00 or best offer**
