Carbon Fibre Road Bike

It's almost summer and Bike Riding season is on the horizon!

Avail yourself with this almost new all Carbon Road Bike with high end components for a fraction of a cost of a new Carbon Road bike. Bike has more or less 200km on the roads of Yellowknife and it's in pristine condition. It's been well taken cared for indoor when not in use.

Specs as follows:

A) Frame is all carbon Rocky Mountain Prestige frame with a carbon fork, carbon FSA seatpost and a Carbon handlebar. The bike is size small with 45cm seat tube with sloping top tube.

The effective/traditional size is 51-52cm which is good for smaller riders 5"3' to 5"6' for both men and women riders. I'm 5"5' and fits me well.

B) It also uses a Shimano Ultegra groupset with a Mavic Cosmic Pro wheelset used in the pro peloton.

C) A Garmin GPS wireless bike computer is also included.

I have a regular pedal installed but you can easily install a clipless pedal of your choice.

The bike has no issues at all and is ready for the road. This bike is light, fast and agile and very comfortable for racing and in long rides.

The reason for selling is to fund a new bike that will cost me 5K.

Text me at 867-445-8959 if you're interested. You can test ride the bike and I can adjust it for your height.

Price: \$ 1,300.00 or best offer
