Wall tent wood stove

Rolled steel, welded wood stove made in the US by 4 dog stove company in Minnesota. Comes with nesting stove pipe, warming shelf and legs. All accessories fit inside the stove. Has a baffle inside for increased efficiency. This is an older model that was used a few seasons in a wall tent then put into storage. Perfect to keep an 8x10 wall tent warm down to -40 and can definitely heat larger spaces too.

Stove is good and solid and heavy but light enough to throw in a toboggan or hand pulled sled. It is truly air tight with a door gasket and can be damped down to control burn time.

Asking 350. Call or text Mike
