Super Dave's Trailer Repair.

- Trailer levelling.

- Skirting repairs or new skirting.

- Belly bag repairs or new belly bag installs. Say, if you wanna change out your poly b water lines to peck waterlines for insurance purposes. For eg: that's 1 of the problems I fix. Even right to major blow outs or the smallest repairs. The real problem solver is the new double belly bag system. The double belly bag saves super large on your heating expense by doubling the insulation in your floor system. You'll barely ever hear your furnace turning on.This is the biggest topic on trailer repairs.

- Blocking repairs or new pads & most of the time re-use the existing blocking or new blocking & pads.

- Re-insulate sewer and water pipes if there's sewer or water damage from leaks or blow outs as well as anywhere else under the trailer that has suffered a blow out from a sewer or water leak.

- Any type of carpenter repairs like doors not closing or locking properly, floors to cold in certain areas or if your trailer is really old we can install what is known as a double belly bag on the whole trailer underneath your trailer so you'll be toasty warm all winter for years to come.

- Most of the time if you have a sewer or water blowout from a freeze up. We can actually fix the problem most of the time for less money than your basic deductible payment on an insurance claim to fix your problem. Alot of times it's way cheaper to just fix it thru someone with a qualified certificate to do the work like myself.

- So call Super Dave @ 867-446-1491 anytime of the day or night. Even when it's raining, snowing or a big whiteout blizzard. You can always count on Super Dave.

- Even after 45 years in the trade. You can still count on Super Dave.

- Winter seasons here so never fear because Super Dave's here.

- There's no ditch to deep or sewer to stink for Super Dave.
