NahGuh's Carving.

Coming Soon to YK. I'll be done setting up my little shop & pre- build all my blanks such as beds, an assorted variation of vases that you'd actually have to see & there wall decorations with fake high quality vines, silk foliage etc... Custom wall plaques of any size of anything you'd like from pictures of family to animal scenes, Company signs etc... I have a steel fence post bracket I invented back in the 1980's here in YK to attach to Bedrock & I turn my vases upside down & Etch carve any type of image you want on them. Plus everythings painted up. Real eye catchers.

Im from Hope B. C. where I'm from on my mom's side. We're from the Sto' Lo Nation. I'm a First Nation Etch carver. Always learning more & more. Very challenging work.
